SUMMARY

MCA graduate with a strong foundation in backend and full-stack development. Skilled in Java, Spring Boot, C#, .NET, React.js, and database design. Experienced in building REST APIs, working with databases, and developing full-stack applications through projects and internships. Actively seeking Software Developer / Backend Developer roles where I can contribute, learn, and grow.

SKILLS

Technical Competencies:
- Languages: C, C++, Java, Python, JavaScript, C#
- Databases: MySQL, MongoDB, SQL Server
- Backend Technologies: Node.js, Express.js, Spring, Spring Boot, ASP.NET Core
- Frontend Technologies: React.js, HTML5, CSS3
- DevOps & Tools: Git, GitHub, Postman, Docker, Jenkins
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), RESTful APIs, Microservices Architecture, MVC Architecture, Exception Handling, Authentication & Authorization (JWT)

EDUCATION

PG-DAC   Aug 2025 - Feb 2026
Sunbeam(ACTS, C-DAC), Pune

Master of Computer Application   Sep 2023 - Jun 2025
IPS Academy, Indore

Bachelor of Science   Jul 2018 - Sep 2022
PTSNS University, Shahdol

PROJECTS

- **Task Flow:** Designed a microservices-based system for managing employees, tasks, and role-based access in an organization. The system includes secure authentication, task assignment and tracking, employee management, and real-time notifications. It ensures scalability and fault isolation using service discovery and API gateway, implements JWT-based security for protected communication, and supports independent deployment of services built with different technologies.
  Tech Stack: Spring Boot, Spring Security, Spring Cloud Gateway, Eureka, .NET, Node.js, JWT, Spring Data JPA, RabbitMQ,
  https://github.com/D1-92821-Ritesh/Employee-Task-Managment-System
- **Donationchain:** Designed a blockchain-based system for securely storing and managing donor details. The project includes features for tracking donations, real-time reporting, and data analytics. It ensures data integrity and transparency with an immutable ledger, offers a simplified user interface, and is scalable for handling large datasets.
  Tech Stack: Express, EJS, Solidity
  https://github.com/ritesh-dwivedii/Donationchain
- **Stayzy:** Currently developing a rental booking platform that facilitates seamless property listings and bookings. The platform aims to provide an intuitive user experience, secure payment integration, and efficient booking management to simplify rental processes for both owners and tenants.
  Tech Stack: Node.js, Express.js, MongoDB
  https://github.com/ritesh-dwivedii/stayzy

ACHIEVEMENTS

- **TCS CodeVita (2024):** Secured a global rank of 2091 in TCS CodeVita Season 12..
- **Deloitte Australia Technology Job Simulation (2025):** Completed hands-on simulation projects on emerging tech and industry practices.
- **Infosys Springboard Certification**: Successfully completed certifications in HTML, CSS, and JavaScript through Infosys Springboard platform.
- **TCS iON Communication Skills Certification (2025):** Successfully completed a certified course covering effective communication.
